BCT

COMPANY PROFILE

BEE CONNECT
TECHNOLOGIES W.L.L.

Who We are...

Bee Connect Technologies Wll is a Enterprise Solution provider for Security Systems, Infrastructure and IT/Network, Power management and Extra Low Voltage Systems Integrations (ELV). BCT is established in the state of QATAR in 2011 with the concept of Wherever you are we are never for away.

We specialize in system integration and customization. Our highly-skilled professionals possess in-depth knowldge of systems and processes. And therfore capable of comprehending your requirments to the point, to design tailor-made solutions. Be it sophisticated gadgets for domestic purpose, or high-end systems for organizations, we construct cost-effective solutions that cater to the requirements across the board.

Vision

Our Vision serves by implementing Cost effective solution with Advancement of Technologies for our Roadmap and guides every aspect of our business by describing what we need to accomplish in order to continue achieving sustainable, quality growth.

Mission

Our Philosophy is not selling the product, knowing the customer needs providing a perfect solution making a business relationship, We are committed to delivering maximum value to our clients helping them succeed in a constantly changing and challenging Security World.

What We Do...

BCT Operates in the following domains :

- IP CCTV Systems

- IP TV Systems

- Access Control Systems

- Public Address Systems

- Building Management Systems

- IP Telephony & Unified Communications

- Data Networking & Wireless Lan Solutions

- Structured Cabling Solutions

- UPS Solution

- Technical Support & Maintenance

IP CCTV SYSTEM

Bee Connect Technologies, Using IP video encoders and other equipment such as Network video recorders and hybrid NVRs makes it possible to leverage your existing analog cameras while migrating into the world of digital surveillance.

IP CCTV video technology provides flexible, scalable, and cost effective surveillance Solutions suitable for a wide range of industries and applications. With an IP-based video surveillance setup, users can monitor and record video remotely using an IP network as the system's Backbone. IP video installations can be deployed in any environment, and offer many benefits previously unavailable with analog CCTV Systems. Our Solutions based on Qatar MOI regulations.

Our excellent tech team with cutting edge knowledge and deliverance has been a strong support for our current depth in the market.

ACCESS CONTROL SYSTEMS

Different Access control technologies provide different levels of security. Combining proximity technology with biometrics yields the highest level of security by adding an extra layer of ID verification. Either of these independently or opt for other types of readers that offer a less expensive yet viable alternative for medium and low level security.

Heavy traffic requires a technology that can process authorization data quickly. A proximity reader takes less than half a second whereas a biometric reader requires up to two seconds and is better suited to less busy situations.

DOOR LOCKING DEVICES

The most common locking devices used in the industry are electric door strikes and electromagnetic locks. To select which locking device should be used on a specific job, should begin with an evaluation that takes into account not only the security requirements but also the regulations imposed by local and national authorities.

PUBLIC ADDRESS SYSTEM

We provide our clients a wide range of Public Address Systems, which is offered with and without built-in audio systems which is renowned across the nation for its sound quality and other quality features.

IP TV SYSTEM

Internet Protocol Television, is a system through which television services are delivered using the Internet protocol suite over a packet-switched network such as a LAN or the internet, instead of being delivered through traditional terrestrial, satellite signal and cable television formats.

BUILDING MANAGEMENT SYSTEM

BCT design and provides the most advanced green technology solutions to monitor and manage all equipment components installed on your premises, including heating, ventilation, cooling, security and lighting. With local or remote control that is scalable, cost efficient and evironmemtally friendly.

The result is a system that integrates all your building equipment, organizes the information in the most logical way imaginable and deliver it where and when you need it. And with wireless technologies, you cost-effectively expand into all kinds of spaces you couldn't before. We have building control systems to manage the energy, comfort and protection needs of your building no matter how simple or complex.

IP TELEPHONY & UNIFIED COMMUNICATIONS

Our premier solutions will provide end-to-end enterprise communications solutions including voice, data & Video. Unified Communications is describing the integration of real-time, enterprise, communication service such as instant messaging, presence information, voice, mobility fratures, audio, web & video conferencing fixed-mobile convergence, desktop sharing, data sharing, call control and speech recognition with non-real-time communication services such as unified messaging.

Products :

- **Push button telephones**

- **Digital Key telephone systems**

- **DECT**

- **Audio and Video conference systems**

- **Voice Mail and Auto Attendant**

- **Call billing software**

DATA NETWORKING & WIRELESS LAN SOLUTIONS

Our IT specialists will customs design and implement a network solution that is right for you, whether you are upgrading your existing Local Area Network (LAN) or launching a new business. From cabling, patching, switch configuration, all the way through to Internet and wireless connectivity.

We also offer turnkey Data/Voice/Video connectivity solutions on wireless to build Indoor Wireless LAN, outdoor point-to-point, point-to-multipoint, campus-wide, metropolitan area and Wide-area networks.

Our strong Technical and Solution design team enables us to provide total and cost-effective solutions to our customers. We will make the most of your LAN or WAN by addressing a full spectrum of issues including connectivity, redundancy, availability, scalability, security, manageability and serviceability in line with the industry's best practices.

- **Enterprise Network Switches and Routers**

- **Controller Based WLAN System**

- **Enterprises Servers and Storage**

- **Firewalls and UTM Solution**

- **Network Management System**

STRUCTURED CABLING SYSTEM

Provides the critical backbone of a communication system for all the ELV systems in any project. We involved in designing planning, installing and maintaining network communication systems with Structured Cabling.

With our expertise and experience, we provides our customers with the commitment that their telecommunications infrastructure, no matter how complex, will be designed, constructed, and installed to meet their current and future business needs.

- **Fiber Cabling Solutions & FTTX**

- **Multimode & Single Mode Fiber Cables**

- **Copper Cabling Solutions**

- **Cabling for All ELV Solution**

UPS SOLUTIONS

We offer an extensive range of products including UPS, inverters up to batteries, enabling us to accommodate all the needs of our customers up to their full satisfaction.

We deliver a complete power solution to the customer. We are committed in delivering the customer with clean, reliable and uninterrupted power to save their valuable data and secure the sensitive Electronic Equipment's.

# TECHNICAL SUPPORT & MAINTENANCE

We offer a complete, yet flexible support and maintenance services on all the solutions we provide to meet the needs of every customer.

Our support services include :

- Telephone and email guidance

- Telephone and online helpdesk support

- Service Level Agreements (SLAS)

- Onsite support
